MATHEMATICS 0580/23

Paper 2 (Extended) May/June 2012

1 hour 30 minutes

Candidates answer on the Question Paper.

Additional Materials: Electronic calculator

Electronic calculator Geometrical instruments
Mathematical tables (optional) Tracing paper (optional)

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a pencil for any diagrams or graphs.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

Answer all questions.

If working is needed for any question it must be shown below that question.

Electronic calculators should be used.

If the degree of accuracy is not specified in the question, and if the answer is not exact, give the answer to three significant figures. Give answers in degrees to one decimal place.

For π , use either your calculator value or 3.142.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

The total of the marks for this paper is 70.

The diagram shows a quadrilateral *ABCD*. *CDE* is a straight line.

Calculate the value of *x*.

$$Answer x = [2]$$

2 Hans invests \$750 for 8 years at a rate of 2% per year simple interest.

Calculate the interest Hans receives.

3 (a) Calculate $\sqrt[3]{7^{1.5} + 22^{0.9}}$ and write down your full calculator display.

Answer(a) [1]

(b) Write your answer to **part (a)** correct to 4 significant figures.

The diagram shows a pyramid on a square base ABCD.

The diagonals of the base, AC and BD, intersect at M.

The sides of the square are 8 cm and the vertical height of the pyramid, PM, is 5 cm.

Calculate

(a) the length of the edge PB,

(b) the angle between PB and the base ABCD.
